

# West Georgia Regional Science and Engineering Fair

**When: February 7, 2025**

**Where: University of West Georgia, Carrollton Campus**

The West Georgia Regional Science & Engineering Fair (WGRSEF) is West Georgia's premier forum for middle and high school students to showcase their original research, compete for awards, and interact with top-level professional scientists. Science fairs in Georgia serve not only to recognize students for their achievements but also to prepare them to succeed and flourish in an increasingly complex and highly technical world by becoming problem solvers, critical thinkers, reflective learners, and more productive and influential members of their communities.

Students are required to have competed and advanced through a school or county level event in the participating counties before applying to WGRSEF. Home school competitors need to have competed in a homeschool group or the nearest school in their region.

## Participating Counties:

**Carroll  
Coweta  
Douglas  
Haralson  
Heard  
Meriwether  
Polk  
Troup**
