

InterviewStream Ending Internet Explorer 8 Support

As you may know, Microsoft has recently announced that they will phase out support for Internet Explorer 8 in January 2016. This change by Microsoft will force some customers to transition their organization to a new browser within the next year.

All InterviewStream products are browser agnostic and are fully supported on the most recent versions of Internet Explorer, Safari, Chrome, Firefox, and Opera. We will continue to update our products to be compatible with all supported versions of these browsers moving forward, including IE 10 and IE 11.

However, when Microsoft officially no longer supports IE8, we will not be able to guarantee full functionality on IE8 as our software evolves to meet the needs of newer browsers. We therefore recommend that all InterviewStream customers who will need to transition away from older versions of Internet Explorer do so well in advance of the January 2016 cutoff date. This will ensure that your organization will continue to have the best InterviewStream experience.

Thank you for using InterviewStream and feel free to contact us any time at support@interviewstream.com if you have any questions. We are happy to assist with any issues relating to your organization's IT requirements.
